

DAILY BOREDOM BUSTER

Target Practice

Construct this easy to build target practice game with a few basic materials from around your home.

What you'll need:

- ⇒ Large cardboard box with both short flaps and one long flap removed (leave the other long flap for balance)
- ⇒ String
- ⇒ 6 Reusable foam or plastic cups
- ⇒ Markers
- ⇒ Scissors
- ⇒ A soft ball

Instructions:

- ⇒ Carefully snip a small hole in the middle of the base of each cup, thread varying lengths of string through each cup and tie off.
- ⇒ Using the markers, add a different number value on each cup. These are the points your kids score when they hit the cups.
- ⇒ Turn your box on its side so the remaining flap is on the bottom and carefully cut 6 holes along the top, making sure that the holes are spaced far enough apart to allow each cup to swing freely in the box.
- ⇒ Hang each cup inside the box at different heights and your target practice game is ready to use.
- ⇒ Give each child 10 throws to score as many points as possible by hitting cups with the soft ball.
